MAAZ SOLKAR

JUNIOR CLOUD ENGINEER | CLOUD SUPPORT ENGINEER L1 | IT & CLOUD ADMINISTRATOR | JUNIOR CLOUD OPERATIONS ENGINEER | JUNIOR SYSTEM ADMINISTRATOR

Location: Mumbai, India Email: contact.maazsolkar@gmail.com Portfolio: https://maazsolkar.github.io LinkedIn: linkedin.com/in/maaz-solkar

PROFESSIONAL SUMMARY

Infrastructure Operations & Cloud Support specialist with **3+ years of enterprise IT experience** supporting 100+ enterprise users, sustaining **95%+ SLA compliance** in ServiceNow, administering Active Directory directory services, and maintaining critical infrastructure health. Certified in **Microsoft Azure Fundamentals (AZ-900)** with comprehensive hands-on training in **AWS Solutions Architect - Associate** architectural patterns, intermediate Linux systems administration, Docker containerization, and Python serverless data pipelines (Google Cloud Functions & BigQuery). Proven track record of analytical troubleshooting, cross-functional escalation coordination with Security and SysAdmin teams, and Standard Operating Procedure (SOP) rigor. Targeting entry-level positions including **Junior Cloud Engineer, Cloud Support Engineer L1, IT & Cloud Administrator, Junior Cloud Operations Engineer, and Junior System Administrator**.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, VPC, IAM, RDS, Route 53, CloudWatch, Auto Scaling, Security Groups); Azure (AZ-900 Certified, Entra ID, Resource Groups, Intune MDM/MAM); Google Cloud Platform (Cloud Functions, BigQuery serverless ingestion, Cloud IAM).

Systems Administration & Identity: Windows Server, Active Directory Domain Services (user provisioning, OUs, Group Policy Objects / GPOs, domain joins), Linux (Ubuntu/Debian, SSH, systemd, user administration, bash CLI), Microsoft 365 Admin (Exchange, Teams, OneDrive).

Networking & Security: TCP/IP, DNS records & resolution troubleshooting, DHCP, static IP assignment, VPN tunneling (client & gateway connectivity), LAN/Wi-Fi triage, enterprise firewall issue triage, endpoint security isolation.

Containers & Scripting: Docker, Docker Compose, container networking, persistent volume mounts, Python (REST APIs, JSON schema normalization, automated logging), Bash command-line scripting.

ITSM & Operations: ServiceNow incident/request management, SLA tracking, IT asset inventory, vendor coordination, VIP executive support, system health monitoring dashboards, hardware diagnostics & upgrades.

CERTIFICATIONS & CLOUD TRAINING

Microsoft Certified: Azure Fundamentals (AZ-900) — **Certified 2026**

Validated foundational knowledge of cloud architectural concepts, compute, storage, networking, security, privacy, and cloud governance.

AWS Solutions Architect - Associate Training — **Atari Classes (Coursework & Labs Completed)**

In-depth curriculum covering resilient multi-AZ VPC architectures, public/private subnets, NAT gateways, IAM least-privilege policies, S3 lifecycle management, EC2 auto scaling, RDS failover, and CloudWatch operational metrics.

CLOUD & INFRASTRUCTURE PROJECTS

Serverless Weather Data Ingestion Pipeline — **Python | Google Cloud Functions | BigQuery | Cloud IAM**

- Architected an automated serverless ETL ingestion pipeline collecting external weather observation feeds via REST APIs and processing payloads in Python using Google Cloud Functions.
- Implemented payload schema normalization, error handling, and idempotent record ingestion into partitioned BigQuery analytical tables.
- Configured dedicated least-privilege Cloud IAM service account roles, eliminating hardcoded keys and securing cloud storage access.

Automated IP Geolocation Analytics Logger — **Python | Google Cloud Functions | BigQuery | REST API Integration**

- Constructed a serverless event-driven logging pipeline extracting incoming IP metadata, resolving geographic attributes via external APIs, and persisting structured audit records to Google BigQuery.
- Designed robust payload validation for malformed requests and implemented comprehensive cloud logging for operational error diagnostics.

Containerized Local AI Inference Server — **Linux (Ubuntu) | Docker & Docker Compose | Ollama | Open WebUI**

- Deployed a self-hosted local language model runtime using Docker container stacks on Linux, configuring isolated Docker bridge networking between Ollama API and Open WebUI frontend.
- Configured persistent volume mounts, automated service restarts via Docker/systemd, and performed CPU/GPU resource monitoring to optimize inference responsiveness and prevent memory leaks.

Active Directory Domain Services & Identity Lab — **Windows Server | Active Directory Domain Services | DNS | Group Policy (GPO)**

- Configured an isolated Windows Server directory services lab, building forest/domain infrastructure and configuring forward/reverse DNS lookup zones.
- Provisioned Organizational Units (OUs), security user groups, and enforced Group Policy Objects (GPOs) for workstation baseline security, password policies, and delegated rights.
- Validated client workstation domain-join procedures, verified Kerberos authentication tokens, and documented operational disaster recovery snapshots.

PROFESSIONAL EXPERIENCE

Desktop Support Engineer L2 — **Insight Business Machine Pvt Ltd** — **Mar 2026 – Present**

- Monitor operational availability and health of enterprise on-premise servers, network switches, and executive video conference infrastructure, ensuring uninterrupted business operations.
- Administer Active Directory identity lifecycles: user account provisioning/deprovisioning, password resets, account unlock triage, OU structure maintenance, and security GPO deployment.
- Deliver high-touch Tier-2 technical support to VIP executives and end users, rapidly resolving hardware diagnostics, software dependencies, and network connectivity incidents.
- Package and deploy enterprise software updates adhering to corporate compliance baselines; coordinate and track third-party hardware/software vendor escalations to full resolution.

Remote Support Engineer — **CMS IT Services** — **Jul 2025 – Mar 2026**

- Provided multi-tenant remote infrastructure and technical support to 100+ distributed enterprise users across Windows environments.
- Managed incident and request tickets via ServiceNow, resolving 10–20 tickets daily while consistently sustaining **95%+ SLA compliance** during peak high-volume cycles.
- Executed remote enterprise domain joins, static IP configuration, DNS cache troubleshooting, and automated application rollouts.
- Triaged firewall connectivity anomalies and endpoint security software events, collaborating closely with Tier-3 Network Security, SysAdmin, and Patch Management teams.

Desktop Support Engineer — **Orient Technologies** — **Jun 2024 – Jul 2025**

- Delivered comprehensive onsite IT infrastructure support for 80+ enterprise users, executing standard OS imaging, system deployments, and enterprise domain integration.
- Diagnosed and remediated LAN/Wi-Fi outages, network printer queues, and secure corporate VPN client tunneling issues.
- Maintained accurate IT hardware and software asset inventories, supporting scheduled compliance reviews and equipment lifecycles.

Desktop Support Engineer — **Real Infotechnologies** — **Oct 2023 – Jun 2024**

- Orchestrated full employee IT onboarding and offboarding workflows, provisioning enterprise Windows workstations, corporate email, VPN credentials, and tracked asset distribution.
- Supported hybrid and remote workforces with VPN access, application troubleshooting, and internet routing remediation.
- Conducted component-level hardware diagnostics, preventative maintenance, and physical hardware upgrades (RAM expansions, SSD swaps).

Data Research Analyst — **Hybrid Demand ITES** — **Sep 2019 – Aug 2021**

- Conducted technical prospect analysis and enterprise lead verification utilizing LinkedIn, Boolean search operators, and structured spreadsheet data modeling.
- Maintained high data integrity standards, ensuring validated dataset deliveries for marketing and business operations teams.

Production Supervisor & Lab Chemist — **Aroma Intermediate Pvt Ltd** — **Jan 2018 – May 2019**

- Supervised plant unit operations (distillation columns, vacuum systems, heat exchangers, pumps, reactors) under strict Standard Operating Procedures (SOPs).
- Diagnosed mechanical and process anomalies (reactor pressure spikes, column leaks, pump cavitation) with disciplined root-cause analysis methodologies.
- Conducted analytical laboratory testing (Gas Chromatography, Thin Layer Chromatography, purity titrations) and managed Effluent Treatment Plant (ETP) compliance.

EDUCATION

Bachelor of Engineering (B.E.) in Chemical Engineering — **2012 – 2016**

MGM's Jawaharlal Nehru Engineering College, Aurangabad | First Class (60%)

Post Graduate Diploma in Process Engineering — **2016**

Suvidya Institute of Technology (ISO 9001:2008 Certified) | Grade B (66%)

Diploma in Plastic & Polymer Engineering — **2009 – 2012**

Institute of Petrochemical Engineering, Dr. Babasaheb Ambedkar Technological University (BATU), Lonere | First Class (64%)
